Help

STARTER		
Standard		
PERFORMANCE		
General Purpose	CPU-Optimized	Memory-Optimized

Standard virtual machines with a mix of memory and compute resources. Best for small projects that can handle variable level performance, like blogs, web apps and dev/test environments.

<div>\$5/mo \$0.007/hour</div> <div>1 GB / 1 CPU 25 GB SSD disk 1000 GB transfer</div>	<div>\$10/mo \$0.015/hour</div> <div>2 GB / 1 CPU 50 GB SSD disk 2 TB transfer</div>	<div>\$15/mo \$0.022/hour</div> <div>1 GB / 3 CPUs 60 GB SSD disk 3 TB transfer</div>	<div>\$15/mo \$0.022/hour</div> <div>2 GB / 2 CPUs 60 GB SSD disk 3 TB transfer</div>	<div>\$15/mo \$0.022/hour</div> <div>3 GB / 1 CPU 60 GB SSD disk 3 TB transfer</div>	<div>\$20/mo \$0.030/hour</div> <div>4 GB / 2 CPUs 80 GB SSD disk 4 TB transfer</div>	<div>\$40/mo \$0.060/hour</div> <div>8 GB / 4 CPUs 160 GB SSD disk 5 TB transfer</div>	<div>\$80/mo \$0.119/hour</div> <div>16 GB / 8 CPUs 320 GB SSD disk 6 TB transfer</div>

How many Droplets?

Deploy multiple Droplets with the same configuration.

Choose a hostname

Give your Droplets an identifying name you will remember them by. Your Droplet name can only contain alphanumeric characters and periods.

1 Droplet

fullstack

Add tags

Use tags to organize and relate resources. Tags may contain letters, numbers, colons, dashes, and underscores.

Type tags here
