## Welcome, tvhome466@gmail.com!

To begin, let's create a new project. Projects help you organize your resources by environment, workload, client - however you or your team like to work.

**Note:** You can change the name, redefine the purpose, and move resources between projects as your needs change.

### Create your first project

### What is your project for?

This information will help us improve the projects experience, based on what you're building.

### Tell us which tools and technologies you plan to use on DigitalOcean
